ELSEVIER

Subject Index to Volume 24

Acetylation
Aspergillus niger, Cellulase, Carboxyl-group modification, Thermodynamics of irreversible denaturation, Transition state theory and temperature of compensation, 599
Acidiphilium
Sulfur-oxidizing bacteria, *Thiobacillus ferrooxidans*, Direct electric currents, 316
Acid phosphatase
Citrobacter, *phoN*, Isoenzymes, Continuous culture, 218
Activity
Dextransucrase, Organic solvent, Stability, 425
Aggregates
Catharanthus roseus, Cell suspension, Ajmalicine distribution, 308
Ajmalicine distribution
Catharanthus roseus, Cell suspension, Aggregates, 308
Alcohol-free beer
Brewer's yeast, DEAE-cellulose, Immobilization, Physiology, Flavor, Process control, 407
Aldicarb
Degradation, Pesticide, Cell immobilization, Carboxymethylcellulose, Bioreactor, 291
Alginate
Penicillium variabile, Elicitation, Glucose oxidase, Oligosaccharides, 397
Alginate beads
Biotransformation, *Pseudomonas putida* UV4, *Escherichia coli* JM109 (pKST11), Recombinant organism, 232
α-Amylase
B. stearothermophilus, Thermoamylase, Maltohexaose, Malto pentaose, Molecular cloning, 584
Amylase production
Amylolytic lactic acid bacteria, Mussel processing wastes, Lactic acid production, Glycogen, *Lactobacillus plantarum* A6, 590
Amylolytic lactic acid bacteria
Mussel processing wastes, Lactic acid production, Glycogen, Amylase production, *Lactobacillus plantarum* A6, 590
Anaerobic degradation
Formaldehyde, Pathway, Toxicity, Biodegradability, Methanogenic bacteria, Methanol, 255
Analytical standard
Uridine 5′-diphosphoglucuronyl transferase, β-D-glucuronide, Enzymic synthesis, 388
Ancylostoma caninum anticoagulant peptide (rAcAP-5)
Pichia pastoris, Recombinant protein, Fed-batch fermentation, Response surface methodology, 438
Anthraquinone-2,6-disulfonate
Cross-flow membrane filtration, Electrochemical mediator regeneration, Enzyme–membrane reactor, (2*R*)-hydroxycarboxylate-viologen-oxidoreductase, (*R*)-lactate, Potentiostatic system, *Proteus vulgaris*, Pyruvate, 471
Apple (*Malus pumila* L. Bramley's Seedling)
Polyphenol oxidase, Enzyme purification, DEAE-Sephadex, Batch purification, 225
Arabinanase
Xylanase, β-mannanase, Pectinolytic enzymes, *Thermomyces lanuginosus*, 355
Arabinogalactoprotein
Hydrodynamic stress, Rheology, Betalains, 687
Arnebia euchroma
Fungal elicitors, Shikonin, Elicitation, *In situ* extraction, Plant cell culture, Metabolite production, 243
Aroma Enhancement
Yeast β-glucosidases, Purification, Immobilization, Hydroxyapatite, Wine, Fruit juices, 123
Arthrobacter viscosus
Carboxylesterase, Cellulose acetylation, 200
Artifical nano-environments
Immobilized enzymes, Stabilization of enzymes, Solid-phase modification of proteins, Enzymes in organic media, Dextrans, 96
Aspergillus niger
Citric acid, Carob pod, Solid-state fermentation, 54
Heterologous protein, Chemostat, Morphology, Image analysis, 489
Immobilized cells, Polymethylgalacturonase, Pectinase, Regulation, Induction, 535
Reaction progress curve, Glucose oxidase, Enzyme kinetics, Enzyme immobilization, Glucono-δ-lactone, Gluconic acid, ^{13}C-NMR, 675
Cellulase, Carboxyl-group modification, Acetylation, Thermodynamics of irreversible denaturation, Transition state theory and temperature of compensation, 599
Aspergillus phoenicis
β-glucosidase, Enzyme stabilization, 362

B. Stearothermophilus
α-amylase, Thermoamylase, Maltohexaose, Malto pentaose, Molecular cloning, 584
Bacillus coagulans
Lactic acid, Continuous fermentation, Kinetic studies, 191
Bacillus licheniformis
Mass flux balance-based stoichiometric model, Serine alkaline protease, Meta bolic pathway engineering analysis, 621
Bacillus macerans
Cyclodextrin glycosyltransferase, ELISA, Polyclonal antibodies, 35
Bacillus subtilis
β-glucanase, Lichenase, *crsA*, Cotton seed meal, Lemon peel, 325
Bacterial exopolysaccharides
Stray field magnetic resonance, Water mobility, Water transport, 339
Bacterium
Esterase, Lipase, Thermophile, Thermostability, 332
Batch purification
Apple (*Malus pumila* L. Bramley's Seedling), Polyphenol oxidase, Enzyme purification, DEAE-Sephadex, 225
Betalains
Hydrodynamic stress, Rheology, Arabinogalactoprotein, 687
Bioconversion
Curvularia protuberata, Bromoperoxidase, Dehydrogenase, 1S,2R-indene oxide, *Trans*-2S,1S-bromoindanol, 86
Saffron, *Crocus sativus*, *Iridaceae*, Glycosylation, Crocetin glycosylesters, Di-neapolitanosyl crocetin ester, Plant cell culture, Carotenoids, 453
Biodegradability
Formaldehyde, Anaerobic degradation, Pathway, Toxicity, Methanogenic

bacteria, Methanol, 255
Biodegradation
Decolorization, White rot fungi, Effluent treatment, Bioreactor, 48
Biofilter
Surfactant, Pluronic F68, Hexane, VOC, Henry's Law, Biofiltration, 104
Biofiltration
Surfactant, Pluronic F68, Hexane, VOC, Henry's Law, Biofilter, 104
Bioprotectant
Paecilomyces variotii, Boron, β-D-1,4-glucosidase, 402
Bioreactor
Biodegradation, Decolorization, White rot fungi, Effluent treatment, 48
Degradation, Pesticide, Aldicarb, Cell immobilization, Carboxymethylcellulose, 291
Biotransformation
Pseudomonas putida UV4, *Escherichia coli* JM109 (pKST11), Alginate beads, Recombinant organism, 232
Decolorization, Triphenylmethane dyes, Synthetic effluent, Textile and dye-stuff effluent, Chemical oxygen demand, *Kurthia* sp., 433
Boron
IPaecilomyces variotii, Bioprotectant, β-D-1,4-glucosidase, 402
Brewer's yeast
DEAE-cellulose, Immobilization, Physiology, Alcohol-free beer, Flavor, Process control, 407
Bromoperoxidase
Bioconversion, *Curvularia protuberata*, Dehydrogenase, 1S,2R-indene oxide, *Trans*-2S,1S-bromoindanol, 86
Bubble column
Lysozyme, Gas, Inactivation, Interface, Kinetics, 412

C4 chiral synthon
(*R*)-4-chloro-3-hydroxybutyrate, (*S*)-3-hydroxy-γ-butyrolactone, *Enterobacter*, Stereoselective dechlorination, 13
Ca^{2+} concentration
Mannuronan C-5-epimerase, Reaction mechanism, 636
Candida rugosa
Lipase, Polyethylene glycol, 181
Capillary membrane bioreactor
Polyphenol oxidase, Phenol removal, Enzyme immobilization, Chitosan, 209
Carbon dioxide
Succinic acid, Hydrogen, Initial glucose concentration, 549
Carboxyl-group modification
Aspergillus niger, Cellulase, Acetylation, Thermodynamics of irreversible denaturation, Transition state theory and temperature of compensation, 599
Carboxylesterase
Arthrobacter viscosus, Cellulose acetylation, 200
Carboxymethylcellulose
Degradation, Pesticide, Aldicarb, Cell immobilization, Bioreactor, 291
Carob pod
Citric acid, *Aspergillus niger*, Solid-state fermentation, 54
Carotenoids
Saffron, *Crocus sativus*, *Iridaceae*, Bioconversion, Glycosylation, Crocetin glycosylesters, Di-neapolitanosyl crocetin ester, Plant cell culture, 453
Caseinomacropeptide
Enzymatic membrane reactor, Trypsin, Hydrolysis, Sequential mechanism, 173
Catharanthus roseus
Cell suspension, Aggregates, Ajmalicine distribution, 308
Cell immobilization
Degradation, Pesticide, Aldicarb, Carboxymethylcellulose, Bioreactor, 291
Cell suspension
Catharanthus roseus, Aggregates, Ajmalicine distribution, 308
Cellobiohydrolases
Softwood kraft pulp, *Trichoderma reesei*, Genetically modified cellulas es, Endoglucanases, 371
Cellulase activities
Softwood, Hydrolysis, Protein adsorption, 138
Cellulase
Aspergillus niger, Carboxyl-group modification, Acetylation, Thermodynamics of irreversible denaturation, Transition state theory and temperature of compensation, 599
Neocallimastix patriciarum, Endoglucanase, *Trichoderma reseei*, Rumen, 609
Fermentation, Simultaneous, Poplar, Pretreatment, Physicochemical properties, 667
Cellulose acetylation
Carboxylesterase, *Arthrobacter viscosus*, 200
Cephalexin
Enzymatic synthesis, β-lactam antibiotic, Solvents, Penicillin acylase, Penicillin amidase, 498
Chemical oxygen demand
Biotransformation, Decolorization, Triphenylmethane dyes, Synthetic effluent, Textile and dye-stuff effluent, *Kurthia* sp., 433
Chemostat
Heterologous protein, *Aspergillus niger*, Morphology, Image analysis, 489
Chitinase
Transformation, Constitutive expression, *Trichoderma reesei*, 419
Chitosan
Polyphenol oxidase, Phenol removal, Capillary membrane bioreactor, Enzyme immobilization, 209
α-Chymotrypsin
Membrane reactor, Reversed micelles, Dipeptide synthesis, Process integration, Precipitation, 507
Citric acid
Carob pod, *Aspergillus niger*, Solid-state fermentation, 54
Citrobacter
Acid phosphatase, *phoN*, Isoenzymes, Continuous culture, 218
Cloning
Flavobacterium meningosepticum, Expression, β-glucosidase, 144
^{13}C-NMR
Reaction progress curve, Glucose oxidase, Enzyme kinetics, Enzyme immobilization, Glucono-δ-lactone, Gluconic acid, *Aspergillus niger*, 675
Colloidal liquid aphrons
Enzyme immobilisation, Superactivity, Surfactants, 541
Conformational stability
Cutinase, Dextran, Immobilization, Thermostability, 60
Constitutive expression
Transformation, Chitinase, *Trichoderma reesei*, 419
Continuous culture
Citrobacter, Acid phosphatase, *phoN*, Isoenzymes, 218
Continuous fermentation
Lactic acid, *Bacillus coagulans*, Kinetic studies, 191
Coriolus versicolor
Phenolic compounds, Laccase, Wheat bran, 303
Cotton seed meal
Bacillus subtilis, β-glucanase, Lichenase, *crsA*, Lemon peel, 325
Crabtree effect
Respirofermentative metabolism, Gas production, *Zygosaccharomyes bailii*, 270
Crocetin glycosylesters
Saffron, *Crocus sativus*, *Iridaceae*, Bioconversion, Glycosylation, Di-neapolitanosyl crocetin ester, Plant cell culture, Carotenoids, 453
Crocus sativus
Saffron, *Iridaceae*, Bioconversion, Glycosylation, Crocetin glycosylesters, Di-neapolitanosyl crocetin ester, Plant cell culture, Carotenoids, 453
Cross-flow membrane filtration
Anthraquinone-2,6-disulfonate, Electrochemical mediator regeneration, Enzyme–membrane reactor, (2*R*)-hydroxycarboxylate-viologen-oxidoreductase, (*R*)-lactate, Potentiostatic system, *Proteus vulgaris*, Pyruvate, 471
crsA
Bacillus subtilis, β-glucanase, Lichenase, Cotton seed meal, Lemon peel, 325
Curvularia protuberata
Bioconversion, Bromoperoxidase, Dehydrogenase, 1S,2R-indene oxide, *Trans*-2S,1S-bromoindanol, 86
Cutinase
Conformational stability, Dextran, Immobilization, Thermostability, 60
Lipolytic enzymes, Stability, Reversed

micelles, Transesterification, Ester synthesis, Factorial design, 569
Cyclodextrin glycosyltransferase
Bacillus macerans, ELISA, Polyclonal antibodies, 35

DEAE-Sephadex
Apple (*Malus pumila* L. Bramley's Seedling), Polyphenol oxidase, Enzyme purification, Batch purification, 225
DEAE-cellulose
Brewer's yeast, Immobilization, Physiology, Alcohol-free beer, Flavor, Process control, 407
Decolorization
Biodegradation, White rot fungi, Effluent treatment, Bioreactor, 48
Biotransformation, Triphenylmethane dyes, Synthetic effluent, Textile and dyestuff effluent, Chemical oxygen demand, *Kurthia* sp., 433
D-Fructose-1,6-bisphosphate aldolase (EC 4.1.2.13)
Human-human hybridoma, Human peripheral blood lymphocyte, Immunoglobulin production stimulating factor, Serum-free culture, 41
β-D-1,4-Glucosidase
Paecilomyces variotii, Boron, Bioprotectant, 402
β-D-Glucuronide
Uridine 5′-diphosphoglucuronyl transferase, Enzymic synthesis, Analytical standard, 388
Degradation
Pesticide, Aldicarb, Cell immobilization, Carboxymethylcellulose, Bioreactor, 291
Dehydrogenase
Bioconversion, *Curvularia protuberata*, Bromoperoxidase, 1S,2R-indene oxide, *Trans*-2S,1S-bromoindanol, 86
Dextran hydrolysis
Oligodextran, Dextranase, Membrane reactor, Response surface methodology, 75
Dextran
Conformational stability, Cutinase, Immobilization, Thermostability, 60
Dextranase
Dextran hydrolysis, Oligodextran, Membrane reactor, Response surface methodology, 75
Dextrans
Artifical nano-environments, Immobilized enzymes, Stabilization of enzymes, Solid-phase modification of proteins, Enzymes in organic media, 106
Dextransucrase
Organic solvent, Activity, Stability, 425
D-Hydantoinase
D-phenylhydantoin, D-*p*-hydroxyphenyl hydantoin, Hydantoin racemization, Racemization half-life, 659
Di-neapolitanosyl crocetin ester
Saffron, *Crocus sativus*, *Iridaceae*, Bioconversion, Glycosylation, Crocetin glycosylesters, Plant cell culture, Carotenoids, 453
Dilute acid hydrolysis
Ethanolic fermentation, Fermentation inhibitors, Weak acids, *Saccharomyces cerevisiae*, 151
Dipeptide synthesis
Membrane reactor, Reversed micelles, Process integration, α-chymotrypsin, Precipitation, 507
Direct electric currents
Sulfur-oxidizing bacteria, *Thiobacillus ferrooxidans*, *Acidiphilium*, 316
DL-Amino acids
Optical resolution, Kinetics, L-aminoacylase, 381
DL-Glycero-3-phosphate
Lysophosphatidic acid, Phosphatidic acid, Lipase, Esterification, Fatty acid vinyl ester, 651
D-Phenylhydantoin
D-Hydantoinase, D-*p*-hydroxyphenyl hydantoin, Hydantoin racemization, Racemization half-life, 659
D-*p*-Hydroxyphenyl hydantoin
D-Hydantoinase, D-phenylhydantoin, Hydantoin racemization, Racemization half-life, 659
Dye decoloration
Textile dyes, White rot fungi, *Trametes versicolor*, Sequential decoloration, 130

ELISA
Bacillus macerans, Cyclodextrin glycosyltransferase, Polyclonal antibodies, 35
Effluent treatment
Biodegration, Decolorization, White rot fungi, Bioreactor, 48
Electrochemical mediator regeneration
Anthraquinone-2,6-disulfonate, Cross-flow membrane filtration, Enzyme–membrane reactor, (2*R*)-hydroxycarboxylate-viologen-oxidoreductase, (*R*)-lactate, Potentiostatic system, *Proteus vulgaris*, Pyruvate, 471
Elicitation
Penicillium variabile, Glucose oxidase, Oligosaccharides, Alginate, 397
Fungal elicitors, Shikonin, *Arnebia euchroma*, *In situ* extraction, Plant cell culture, Metabolite production, 243
Enantioselective hydrolysis
Ibuprofen amide, *Rhodococcus*, 160
Endoglucanase
Neocallimastix patriciarum, Cellulase, *Trichoderma reseei*, Rumen, 609
Endoglucanases
Softwood kraft pulp, *Trichoderma reesei*, Genetically modified cellulas es, Cellobiohydrolases, 24 371
Enterobacter
(*R*)-4-chloro-3-hydroxybutyrate, (*S*)-3-hydroxy-γ-butyrolactone, Stereoselective dechlorination, C4 chiral synthon, 13
Enzymatic membrane reactor
Trypsin, Caseinomacropeptide, Hydrolysis, Sequential mechanism, 173
Enzymatic synthesis
Cephalexin, β-lactam antibiotic, Solvents, Penicillin acylase, Penicillin amidase, 498
Enzyme immobilisation
Colloidal liquid aphrons, Superactivity, Surfactants, 541
Enzyme immobilization
Reaction progress curve, Glucose oxidase, Enzyme kinetics, Glucono-δ-lactone, Gluconic acid, *Aspergillus niger*, ^{13}C-NMR, 675
Glucose oxidase, Silicon, Spectrophotometric assay, 26
Polyphenol oxidase, Phenol removal, Capillary membrane bioreactor, Chitosan, 209
Enzyme kinetics
Reaction progress curve, Glucose oxidase, Enzyme immobilization, Glucono-δ-lactone, Gluconic acid, *Aspergillus niger*, ^{13}C-NMR, 675
Enzyme purification
Apple (*Malus pumila* L. Bramley's Seedling), Polyphenol oxidase, DEAE-Sephadex, Batch purification, 225
Enzyme stability
Hydroxynitrile lyase, *Hevea brasiliensis*, Two-phase system, 514
Supercritical carbon dioxide, Lipase, Phase transitions, Fluorescence, 577
Enzyme stabilization
β-glucosidase, *Aspergillus phoenicis*, 362
Enzyme–membrane reactor
Anthraquinone-2,6-disulfonate, Cross-flow membrane filtration, Electrochemical mediator regeneration, (2*R*)-hydroxycarboxylate-viologen-oxidoreductase, (*R*)-lactate, Potentiostatic system, *Proteus vulgaris*, Pyruvate, 471
Enzymes in organic media
Artifical nano-environments, Immobilized enzymes, Stabilization of enzymes, Solid-phase modification of proteins, Dextrans, 96
Enzymic synthesis
Uridine 5′-diphosphoglucuronyl transferase, β-D-glucuronide, Analytical standard, 388
Escherichia coli JM109 (pKST11)
Biotransformation, *Pseudomonas putida* UV4, Alginate beads, Recombinant organism, 232
Ester synthesis
Cutinase, Lipolytic enzymes, Stability, Reversed micelles, Transesterification, Factorial design, 569
Esterase
Lipase, Thermophile, Bacterium, Thermostability, 332
Esterification
Lysophosphatidic acid, Phosphatidic acid, Lipase, DL-glycero-3-phosphate, Fatty acid vinyl ester, 651

Organic solvent, Ping-Pong kinetics, Lipase solvation, 463
Ethanolic fermentation
Dilute acid hydrolysis, Fermentation inhibitors, Weak acids, *Saccharomyces cerevisiae*, 151
Expression
Flavobacterium meningosepticum, Cloning, β-glucosidase, 144

Factorial design
Cutinase, Lipolytic enzymes, Stability, Reversed micelles, Transesterification, Ester synthesis, 569
Fatty acid vinyl ester
Lysophosphatidic acid, Phosphatidic acid, Lipase, Esterification, DL-g lycero-3-phosphate, 651
Fed-batch fermentation
Pichia pastoris, Recombinant protein, *Ancy lostoma caninum* anticoagulant peptide (rAcAP-5), Response surface methodology, 438
Fed-batch
Polyhydroxyalkanoates, High cell density, *Pseudomonas, 111*
Fedbatch
Recombinant glucanase, Modelling, 247
Fermentation inhibitors
Dilute acid hydrolysis, Ethanolic fermentation, Weak acids, *Saccharomyces cerevisiae*, 151
Fermentation
Recombinant *Escherichia coli*, Streptokinase, Purification, 647
Pullulan, Optimization, *Pullularia pullulans*, Medium composition, 276
Simultaneous, Cellulase, Poplar, Pretreatment, Physicochemical properties, 667
Flavobacterium meningosepticum
Cloning, Expression, β-glucosidase, 144
Flavor
Brewer's yeast, DEAE-cellulose, Immobilization, Physiology, Alcohol-free beer, Process control, 407
Fluorescence
Supercritical carbon dioxide, Enzyme stability, Lipase, Phase transitions, 577
Formaldehyde
Anaerobic degradation, Pathway, Toxicity, Biodegradability, Methanogenic bacteria, Methanol, 255
Fruit juices
Yeast β-glucosidases, Purification, Immobilization, Hydroxyapatite, Aroma Enhancement, Wine, 123
Fungal elicitors
Shikonin, *Arnebia euchroma*, Elicitation, *In situ* extraction, Plant cell culture, Metabolite production, 243

G. Candidum
Growth, Proton transfer, *P. camemberti*, Liquid media, 561
Gas production
Respirofermentative metabolism, Crabtree effect, *Zygosaccharomyes bailii*, 270
Gas
Lysozyme, Inactivation, Interface, Bubble column, Kinetics, 412
Genetically modified cellulases
Softwood kraft pulp, *Trichoderma reesei*, Cellobiohydrolases, Endoglucanases, 371
β-Glucanase
Bacillus subtilis, Lichenase, *crsA*, Cotton seed meal, Lemon peel, 325
Gluconic acid
Reaction progress curve, Glucose oxidase, Enzyme kinetics, Enzyme immobilization, Glucono-δ-lactone, *Aspergillus niger*, ^{13}C-NMR, 675
Glucono-δ-lactone
Reaction progress curve, Glucose oxidase, Enzyme kinetics, Enzyme immobilization, Gluconic acid, *Aspergillus niger*, ^{13}C-NMR, 675
Glucose oxidase
Penicillium variabile, Elicitation, Oligosaccharides, Alginate, 397
Enzyme immobilization, Silicon, Spectrophotometric assay, 26
Reaction progress curve, Enzyme kinetics, Enzyme immobilization, Glucono-δ-lactone, Gluconic acid, *Aspergillus niger*, ^{13}C-NMR, 675
Glycogen
Amylolytic lactic acid bacteria, Mussel processing wastes, Lactic acid production, Amylase production, *Lactobacillus plantarum* A6, 590
β-Glucosidase
Flavobacterium meningosepticum, Cloning, Expression, 144
Aspergillus phoenicis, Enzyme stabilization, 362
α-Glucosyltransferase
Serratia plymuthica, Sucrose conversion, Isomaltulose, Trehalulose, Isomaltulose synthase, 263
Glycosylation
Saffron, *Crocus sativus*, *Iridaceae*, Bioconversion, Crocetin glycosylesters, Di-neapolitanosyl crocetin ester, Plant cell culture, Carotenoids, 453
Growth
Proton transfer, *G. candidum*, *P. camemberti*, Liquid media, 561

Henry's Law
Surfactant, Pluronic F68, Hexane, VOC, Biofilter, Biofiltration, 104
Heterologous protein
Aspergillus niger, Chemostat, Morphology, Image analysis, 489
Hevea brasiliensis
Hydroxynitrile lyase, Two-phase system, Enzyme stability, 514
Hexane
Surfactant, Pluronic F68, VOC, Henry's Law, Biofilter, Biofiltration, 104
High cell density
Polyhydroxyalkanoates, Fed-batch, *Pseudomonas*, 111
Human peripheral blood lymphocyte
D-fructose-1,6-bisphosphate aldolase (EC 4.1.2.13), Human-human hybridoma, Immunoglobulin production stimulating factor, Serum-free culture, 41
Human-human hybridoma
D-fructose-1,6-bisphosphate aldolase (EC 4.1.2.13), Human peripheral blood lymphocyte, Immunoglobulin production stimulating factor, Serum-free culture, 41
Hydantoin racemization
D-Hydantoinase, D-phenylhydantoin, D-*p*-hydroxyphenyl hydantoin, Racemization half-life, 659
Hydrodynamic stress
Rheology, Betalains, Arabinogalactoprotein, 687
Hydrogen
Succinic acid, Carbon dioxide, Initial glucose concentration, 549
Hydrolysis
Enzymatic membrane reactor, Trypsin, Caseinomacropeptide, Sequential mechanism, 173
Softwood, Cellulase activities, Protein adsorption, 138
Hydroxyapatite
Yeast β-glucosidases, Purification, Immobilization, Aroma Enhancement, Wine, Fruit juices, 123
Hydroxynitrile lyase
Hevea brasiliensis, Two-phase system, Enzyme stability, 514

Ibuprofen amide
Rhodococcus, Enantioselective hydrolysis, 160
Ibuprofen
Lipase, Immobilization, Stability, Water activity, 3
Image analysis
Heterologous protein, *Aspergillus niger*, Chemostat, Morphology, 489
Immobilization with κ-carrageenan
Pseudomonas dacunhae, L-aspatrate β-decarboxylase enzyme, L-alanine production, 67
Immobilization
Brewer's yeast, DEAE-cellulose, Physiology, Alcohol-free beer, Flavor, Process control, 407
Conformational stability, Cutinase, Dextran, Thermostability, 60
Lipase, Stability, Ibuprofen, Water activity, 3
Yeast β-glucosidases, Purification, Hydroxyapatite, Aroma Enhancement, Wine, Fruit juices, 123
Immobilized cells

Aspergillus niger, Polymethylgalacturonase, Pectinase, Regulation, Induction, 535
Immobilized enzyme
Kinetically controlled dipeptide synthesis, Nucleophile specificity, Nucleophile deprotonation, 480
Immobilized enzymes
Artifical nano-environments, Stabilization of enzymes, Solid-phase modification of proteins, Enzymes in organic media, Dextrans, 96
Immunoglobulin production stimulating factor
D-fructose-1,6-bisphosphate aldolase (EC 4.1.2.13), Human-human hybridoma, Human peripheral blood lymphocyte, Serum-free culture, 41
Inactivation
Lysozyme, Gas, Interface, Bubble column, Kinetics, 412
Induction
Aspergillus niger, Immobilized cells, Polymethylgalacturonase, Pectinase, Regulation, 535
Initial glucose concentration
Succinic acid, Carbon dioxide, Hydrogen, 549
In situ extraction
Fungal elicitors, Shikonin, *Arnebia euchroma*, Elicitation, Plant cell culture, Metabolite production, 243
Interface
Lysozyme, Gas, Inactivation, Bubble column, Kinetics, 412
Iridaceae
Saffron, *Crocus sativus*, Bioconversion, Glycosylation, Crocetin glycosylesters, Di-neapolitanosyl crocetin ester, Plant cell culture, Carotenoids, 453
Isoenzymes
Citrobacter, Acid phosphatase, *phoN*, Continuous culture, 218
Isomaltulose synthase
Serratia plymuthica, Sucrose conversion, Isomaltulose, Trehalulose, α-glucosyltransferase, 263
Isomaltulose
Serratia plymuthica, Sucrose conversion, Trehalulose, α-glucosyltransferase, Isomaltulose synthase, 263

Kinetic studies
Lactic acid, *Bacillus coagulans*, Continuous fermentation, 191
Kinetically controlled dipeptide synthesis
Immobilized enzyme, Nucleophile specificity, Nucleophile deprotonation, 480
Kinetics
Lysozyme, Gas, Inactivation, Interface, Bubble column, 412
Optical resolution, DL-amino acids, L-aminoacylase, 381
Kurthia sp.
Biotransformation, Decolorization, Triphenylmethane dyes, Synthetic effluent, Textile and dye-stuff effluent, Chemical oxygen demand, 433

Laccase
Phenolic compounds, *Coriolus versicolor*, Wheat bran, 303
β-Lactam antibiotic
Enzymatic synthesis, Cephalexin, Solvents, Penicillin acylase, Penicillin amidase, 498
Lactic acid production
Amylolytic lactic acid bacteria, Mussel processing wastes, Glycogen, Amylase production, *Lactobacillus plantarum* A6, 590
Lactic acid
Bacillus coagulans, Continuous fermentation, Kinetic studies, 191
Yeast extract, Whey permeate, *Lactobacillus helveticus*, Lactose, Volumetric productivity, 297
Lactobacillus helveticus
Yeast extract, Whey permeate, Lactic acid, Lactose, Volumetric productivity, 297
Lactobacillus plantarum A6
Amylolytic lactic acid bacteria, Mussel processing wastes, Lactic acid production, Glycogen, Amylase production, 590
Lactose
Yeast extract, Whey permeate, *Lactobacillus helveticus*, Lactic acid, Volumetric productivity, 297
L-Alanine production
Pseudomonas dacunhae, L-aspatrate β-decarboxylase enzyme, Immobilization with κ-carrageenan, 67
L-Aminoacylase
Optical resolution, Kinetics, DL-amino acids, 381
L-Aspatrate β-decarboxylase enzyme
Pseudomonas dacunhae, Immobilization with κ-carrageenan, L-alanine production, 67
Lemon peel
Bacillus subtilis, β-glucanase, Lichenase, *crsA*, Cotton seed meal, 325
Lichenase
Bacillus subtilis, β-glucanase, *crsA*, Cotton seed meal, Lemon peel, 325
Lipase solvation
Esterification, Organic solvent, Ping-Pong kinetics, 463
Lipase
Candida rugosa, Polyethylene glycol, 181
Esterase, Thermophile, Bacterium, Thermostability, 332
Immobilization, Stability, Ibuprofen, Water activity, 3
Lysophosphatidic acid, Phosphatidic acid, Esterification, DL-glycero-3-phosphate, Fatty acid vinyl ester, 651
Supercritical carbon dioxide, Enzyme stability, Phase transitions, Fluorescence, 577
Lipolytic enzymes
Cutinase, Stability, Reversed micelles, Transesterification, Ester synthesis, Factorial design, 569
Liquid media
Growth, Proton transfer, *G. candidum*, *P. camemberti*, 561
Lysophosphatidic acid
Phosphatidic acid, Lipase, Esterification, DL-glycero-3-phosphate, Fatty acid vinyl ester, 651
Lysozyme
Gas, Inactivation, Interface, Bubble column, Kinetics, 412

Malto pentaose
α-amylase, *B. stearothermophilus*, Thermoamylase, Maltohexaose, Molecular cloning, 584
Maltohexaose
α-amylase, *B. stearothermophilus*, Thermoamylase, Malto pentaose, Molecular cloning, 584
β-Mannanase
Xylanase, Arabinanase, Pectinolytic enzymes, *Thermomyces lanuginosus*, 355
Mannuronan C-5-epimerase
Ca^{2+} concentration, Reaction mechanism, 636
Mass flux balance-based stoichiometric model
Serine alkaline protease, Metabolic pathway engineering analysis, *Bacillus licheniformis*, 621
Mass production
Poly(3-hydroxybutyrate-co-3-hydroxyvalerate), Potassium limitation, *Methylobacterium organophilum*, Methanol, 555
Medium composition
Pullulan, Optimization, *Pullularia pullulans*, Fermentation, 276
Membrane reactor
Dextran hydrolysis, Oligodextran, Dextranase, Response surface methodology, 75
Reversed micelles, Dipeptide synthesis, Process integration, α-chymotrypsin, Precipitation, 507
Metabolic pathway engineering analysis
Mass flux balance-based stoichiometric model, Serine alkaline protease, *Bacillus licheniformis*, 621
Metabolite production
Fungal elicitors, Shikonin, *Arnebia euchroma*, Elicitation, *In situ* extraction, Plant cell culture, 243
Methanogenic bacteria
Formaldehyde, Anaerobic degradation, Pathway, Toxicity, Biodegradability, Methanol, 255
Methanol
Poly(3-hydroxybutyrate-co-3-

hydroxyvalerate), Potassium limitation, Mass production, *Methylobacterium organophilum*, 555
Formaldehyde, Anaerobic degradation, Pathway, Toxicity, Biodegradability, Methanogenic bacteria, 255
Methylobacterium organophilum
Poly(3-hydroxybutyrate-co-3-hydroxyvalerate), Potassium limitation, Mass production, Methanol, 555
Microalgal culture
Photobioreactor, *Phaeodactylum tricornutum*, 160
Modelling
Fedbatch, Recombinant glucanase, 247
Molecular cloning
α-amylase, *B. stearothermophilus*, Thermoamylase, Maltohexaose, Maltopentaose, 584
Morphology
Heterologous protein, *Aspergillus niger*, Chemostat, Image analysis, 489
Mussel processing wastes
Amylolytic lactic acid bacteria, Lactic acid production, Glycogen, Amylase production, *Lactobacillus plantarum* A6, 590

Neocallimastix patriciarum
Cellulase, Endoglucanase, *Trichoderma reseei*, Rumen, 609
Nucleophile deprotonation
Kinetically controlled dipeptide synthesis, Immobilized enzyme, Nucleophile specificity, 480
Nucleophile specificity
Kinetically controlled dipeptide synthesis, Immobilized enzyme, Nucleophile deprotonation, 480

Oligodextran
Dextran hydrolysis, Dextranase, Membrane reactor, Response surface methodology, 75
Oligosaccharides
Penicillium variabile, Elicitation, Glucose oxidase, Alginate, 397
Optical resolution
Kinetics, DL-amino acids, L-aminoacylase, 381
Optimization
Pullulan, *Pullularia pullulans*, Medium composition, Fermentation, 276
Organic solvent
Dextransucrase, Activity, Stability, 425
Esterification, Ping-Pong kinetics, Lipase solvation, 463

P. Camemberti
Growth, Proton transfer, *G. candidum*, Liquid media, 561
Paecilomyces variotii
Boron, Bioprotectant, β-D-1,4-glucosidase, 402
Pathway
Formaldehyde, Anaerobic degradation, Toxicity, Biodegradability, Methanogenic bacteria, Methanol, 255
Pectic polysaccharide
Rhamnogalacturonan II, *Penicillium daleae*, Plant cell wall, Pectinase, 283
Pectinase
Aspergillus niger, Immobilized cells, Polymethylgalacturonase, Regulation, Induction, 535
Rhamnogalacturonan II, Pectic polysaccharide, *Penicillium daleae*, Plant cell wall, 283
Pectinolytic enzymes
Xylanase, β-mannanase, Arabinanase, *Thermomyces lanuginosus*, 355
Penicillin acylase
Enzymatic synthesis, Cephalexin, β-lactam antibiotic, Solvents, Penicillin amidase, 498
Penicillin amidase
Enzymatic synthesis, Cephalexin, β-lactam antibiotic, Solvents, Penicillin acylase, 498
Penicillium daleae
Rhamnogalacturonan II, Pectic polysaccharide, Plant cell wall, Pectinase, 283
Penicillium variabile
Elicitation, Glucose oxidase, Oligosaccharides, Alginate, 397
Pesticide
Degradation, Aldicarb, Cell immobilization, Carboxymethylcellulose, Bioreactor, 291
Phaeodactylum tricornutum
Microalgal culture, Photobioreactor, 164
Phase transitions
Supercritical carbon dioxide, Enzyme stability, Lipase, Fluorescence, 577
Phenol removal
Polyphenol oxidase, Capillary membrane bioreactor, Enzyme immobilization, Chitosan, 209
Phenolic compounds
Coriolus versicolor, Laccase, Wheat bran, 303
phoN
Citrobacter, Acid phosphatase, Isoenzymes, Continuous culture, 218
Pho regulon
Polyphosphate, Phosphate starvation, Reporter gene, Plasmid stability, 21
Phosphate starvation
Polyphosphate, Pho regulon, Reporter gene, Plasmid stability, 21
Phosphatidic acid
Lysophosphatidic acid, Lipase, Esterification, DL-glycero-3-phosphate, Fatty acid vinyl ester, 651
Photobioreactor
Microalgal culture, *Phaeodactylum tricornutum*, 164
Physicochemical properties
Fermentation, Simultaneous, Cellulase, Poplar, Pretreatment, 667
Physiology
Brewer's yeast, DEAE-cellulose, Immobilization, Alcohol-free beer, Flavor, Process control, 407
Pichia pastoris
Recombinant protein, Fed-batch fermentation, *Ancy lostoma caninum* anticoagulant peptide (rAcAP-5), Response surface methodology, 438
Ping-Pong kinetics
Esterification, Organic solvent, Lipase solvation, 463
Plant cell culture
Fungal elicitors, Shikonin, *Arnebia euchroma*, Elicitation, *In situ* extraction, Metabolite production, 243
Saffron, *Crocus sativus*, *Iridaceae*, Bioconversion, Glycosylation, Crocetin glycosylesters, Di-neapolitanosyl crocetin ester, Carotenoids, 453
Plant cell wall
Rhamnogalacturonan II, Pectic polysaccharide, *Penicillium daleae*, Pectinase, 283
Plasmid stability
Polyphosphate, Pho regulon, Phosphate starvation, Reporter gene, 21
Pluronic F68
Surfactant, Hexane, VOC, Henry's Law, Biofilter, Biofiltration, 104
Poly(3-hydroxybutyrate-co-3-hydroxyvalerate)
Potassium limitation, Mass production, *Methylobacterium organophilum*, Methanol, 555
Polyclonal antibodies
Bacillus macerans, Cyclodextrin glycosyltransferase, ELISA, 35
Polyethylene glycol
Lipase, *Candida rugosa*, 181
Polyhydroxyalkanoates
Fed-batch, High cell density, *Pseudomonas*, 111
Polymethylgalacturonase
Aspergillus niger, Immobilized cells, Pectinase, Regulation, Induction, 535
Polyphenol oxidase
Apple (*Malus pumila* L. Bramley's Seedling), Enzyme purification, DEAE-Sephadex, Batch purification, 225
Phenol removal, Capillary membrane bioreactor, Enzyme immobilization, Chitosan, 209
Polyphosphate
Pho regulon, Phosphate starvation, Reporter gene, Plasmid stability, 21
Poplar
Fermentation, Simultaneous, Cellulase, Pretreatment, Physicochemical properties, 667
Potassium limitation
Poly(3-hydroxybutyrate-co-3-hydroxyvalerate), Mass production, *Methylobacterium organophilum*, Methanol, 555
Potentiostatic system

Anthraquinone-2,6-disulfonate, Cross-flow membrane filtration, Electrochemical mediator regeneration, Enzyme–membrane reactor, (2*R*)-hydroxycarboxylate-viologen-oxidoreductase, (*R*)-lactate, *Proteus vulgaris*, Pyruvate, 471
Precipitation
Membrane reactor, Reversed micelles, Dipeptide synthesis, Process integration, α-chymotrypsin, 507
Pretreatment
Fermentation, Simultaneous, Cellulase, Poplar, Physicochemical properties, 667
Process control
Brewer's yeast, DEAE-cellulose, Immobilization, Physiology, Alcohol-free beer, Flavor, 407
Process integration
Membrane reactor, Reversed micelles, Dipeptide synthesis, α-chymotrypsin, Precipitation, 507
Protein adsorption
Softwood, Cellulase activities, Hydrolysis, 138
Proteus vulgaris
Anthraquinone-2,6-disulfonate, Cross-flow membrane filtration, Electrochemical mediator regeneration, Enzyme–membrane reactor, (2*R*)-hydroxycarboxylate-viologen-oxidoreductase, (*R*)-lactate, Potentiostatic system, Pyruvate, 471
Proton transfer
Growth, *G. candidum*, *P. camemberti*, Liquid media, 561
Pseudomonas
Polyhydroxyalkanoates, Fed-batch, High cell density, 111
Pseudomonas dacunhae
L-aspatrate β-decarboxylase enzyme, Immobilization with κ-carrageenan, L-alanine production, 67
Pseudomonas putida UV4
Biotransformation, *Escherichia coli* JM109 (pKST11), Alginate beads, Recombinant organism, 232
Pullulan
Optimization, *Pullularia pullulans*, Medium composition, Fermentation, 276
Pullularia pullulans
Pullulan, Optimization, Medium composition, Fermentation, 276
Purification
Recombinant *Escherichia coli*, Streptokinase, Fermentation, 647
Yeast β-glucosidases, Immobilization, Hydroxyapatite, Aroma Enhancement, Wine, Fruit juices, 123
Pyruvate
Anthraquinone-2,6-disulfonate, Cross-flow membrane filtration, Electrochemical mediator regeneration, Enzyme–membrane reactor, (2*R*)-hydroxycarboxylate-viologen-oxidoreductase, (*R*)-lactate, Potentiostatic system, *Proteus vulgaris*, 471
Racemization half-life
D-Hydantoinase, D-phenylhydantoin, D-*p*-hydroxyphenyl hydantoin, Hydantoin racemization, 659
(*R*)-4-Chloro-3-hydroxybutyrate
(*S*)-3-hydroxy-γ-butyrolactone, *Enterobacter*, Stereoselective dechlorination, C4 chiral synthon, 13
Reaction mechanism
Mannuronan C-5-epimerase, Ca^{2+} concentration, 636
Reaction progress curve
Glucose oxidase, Enzyme kinetics, Enzyme immobilization, Glucono-δ-lactone, Gluconic acid, *Aspergillus niger*, ^{13}C-NMR, 675
Recombinant *Escherichia coli*
Streptokinase, Fermentation, Purification, 647
Recombinant glucanase
Fedbatch, Modelling, 247
Recombinant organism
Biotransformation, *Pseudomonas putida* UV4, *Escherichia coli* JM109 (pKST11), Alginate beads, 232
Recombinant protein
Pichia pastoris, Fed-batch fermentation, *Ancy lostoma caninum* anticoagulant peptide (rAcAP-5), Response surface methodology, 438
Regulation
Aspergillus niger, Immobilized cells, Polymethylgalacturonase, Pectinase, Induction, 535
(2*R*)-Hydroxycarboxylate-viologen-oxidoreductase
Anthraquinone-2,6-disulfonate, Cross-flow membrane filtration, Electrochemical mediator regeneration, Enzyme–membrane reactor, (*R*)-lactate, Potentiostatic system, *Proteus vulgaris*, Pyruvate, 471
(*R*)-Lactate
Anthraquinone-2,6-disulfonate, Cross-flow membrane filtration, Electrochemical mediator regeneration, Enzyme–membrane reactor, (2*R*)-hydroxycarboxylate-viologen-oxidoreductase, Potentiostatic system, *Proteus vulgaris*, Pyruvate, 471
Reporter gene
Polyphosphate, Pho regulon, Phosphate starvation, Plasmid stability, 21
Respirofermentative metabolism
Gas production, Crabtree effect, *Zygosaccharomyes bailii*, 270
Response surface methodology
Pichia pastoris, Recombinant protein, Fed-batch fermentation, *Ancylostoma caninum* anticoagulant peptide (rAcAP-5), 438
Dextran hydrolysis, Oligodextran, Dextranase, Membrane reactor, 75
Reversed micelles
Cutinase, Lipolytic enzymes, Stability, Transesterification, Ester synthesis, Factorial design, 569
Membrane reactor, Dipeptide synthesis, Process integration, α-chymotrypsin, Precipitation, 507
Rhamnogalacturonan II
Pectic polysaccharide, *Penicillium daleae*, Plant cell wall, Pectinase, 283
Rheology
Hydrodynamic stress, Betalains, Arabinogalactoprotein, 687
Rhodococcus
Ibuprofen amide, Enantioselective hydrolysis, 160
Rumen
Neocallimastix patriciarum, Cellulase, Endoglucanase, *Trichoderma reseei*, 609
Saccharomyces cerevisiae
Dilute acid hydrolysis, Ethanolic fermentation, Fermentation inhibitors, Weak acids, 151
Saffron
Crocus sativus, *Iridaceae*, Bioconversion, Glycosylation, Crocetin glycosylesters, Di-neapolitanosyl crocetin ester, Plant cell culture, Carotenoids, 453
Sequential decoloration
Dye decoloration, Textile dyes, White rot fungi, *Trametes versicolor*, 130
Sequential mechanism
Enzymatic membrane reactor, Trypsin, Caseinomacropeptide, Hydrolysis, 173
Serine alkaline protease
Mass flux balance-based stoichiometric model, Meta bolic pathway engineering analysis, *Bacillus licheniformis*, 621
Serratia plymuthica
Sucrose conversion, Isomaltulose, Trehalulose, α-glucosyltransferase, Isomaltulose synthase, 263
Serum-free culture
D-fructose-1,6-bisphosphate aldolase (EC 4.1.2.13), Human-human hybridoma, Human peripheral blood lymphocyte, Immunoglobulin production stimulating factor, 41
Shikonin
Fungal elicitors, *Arnebia euchroma*, Elicitation, *In situ* extraction, Plant cell culture, Metabolite production, 243
(*S*)-3-Hydroxy-γ-butyrolactone
(*R*)-4-chloro-3-hydroxybutyrate, *Enterobacter*, Stereoselective dechlorination, C4 chiral synthon, 13
Silicon
Enzyme immobilization, Glucose oxidase, Spectrophotometric assay, 26
Simultaneous
Fermentation, Cellulase, Poplar, Pretreatment, Physicochemical properties, 667
Softwood kraft pulp
Trichoderma reesei, Genetically modified cellulases, Cellobiohydrolases, Endoglucanases, 371

Softwood
Cellulase activities, Hydrolysis, Protein adsorption, 138
Solid-phase modification of proteins
Artifical nano-environments, Immobilized enzymes, Stabilization of enzymes, Enzymes in organic media, Dextrans, 96
Solid-state fermentation
Citric acid, Carob pod, *Aspergillus niger*, 54
Solvents
Enzymatic synthesis, Cephalexin, β-lactam antibiotic, Penicillin acylase, Penicillin amidase, 498
Spectrophotometric assay
Enzyme immobilization, Glucose oxidase, Silicon, 26
1S,2R-Indene oxide
Bioconversion, *Curvularia protuberata*, Bromoperoxidase, Dehydrogenase, *Trans*-2S,1S-bromoindanol, 86
Stability
Dextransucrase, Organic solvent, Activity, 425
Cutinase, Lipolytic enzymes, Reversed micelles, Transesterification, Ester synthesis, Factorial design, 569
Lipase, Immobilization, Ibuprofen, Water activity, 3
Stabilization of enzymes
Artifical nano-environments, Immobilized enzymes, Solid-phase modification of proteins, Enzymes in organic media, Dextrans, 96
Stereoselective dechlorination
(*R*)-4-chloro-3-hydroxybutyrate, (*S*)-3-hydroxy-γ-butyrolactone, *Enterobacter*, C4 chiral synthon, 13
Stray field magnetic resonance
Bacterial exopolysaccharides, Water mobility, Water transport, 339
Streptokinase
Recombinant *Escherichia coli*, Fermentation, Purification, 647
Succinic acid
Carbon dioxide, Hydrogen, Initial glucose concentration, 549
Sucrose conversion
Serratia plymuthica, Isomaltulose, Trehalulose, α-glucosyltransferase, Isomaltulose synthase, 263
Sulfur-oxidizing bacteria
Thiobacillus ferrooxidans, *Acidiphilium*, Direct electric currents, 316
Superactivity
Enzyme immobilisation, Colloidal liquid aphrons, Surfactants, 541
Supercritical carbon dioxide
Enzyme stability, Lipase, Phase transitions, Fluorescence, 577
Surfactant
Pluronic F68, Hexane, VOC, Henry's Law, Biofilter, Biofiltration, 104
Surfactants
Enzyme immobilisation, Colloidal liquid aphrons, Superactivity, 541
Synthetic effluent
Biotransformation, Decolorization, Triphenylmethane dyes, Textile and dye-stuff effluent, Chemical oxygen demand, *Kurthia* sp., 433

Textile and dye-stuff effluent
Biotransformation, Decolorization, Triphenylmethane dyes, Synthetic effluent, Chemical oxygen demand, *Kurthia* sp., 433
Textile dyes
Dye decoloration, White rot fungi, *Trametes versicolor*, Sequential decoloration, 130
Thermoamylase
α-amylase, *B. stearothermophilus*, Maltohexaose, Malto pentaose, Molecular cloning, 584
Thermodynamics of irreversible denaturation
Aspergillus niger, Cellulase, Carboxyl-group modification, Acetylation, Transition state theory and temperature of compensation, 599
Thermomyces lanuginosus
Xylanase, β-mannanase, Arabinanase, Pectinolytic enzymes, 355
Thermophile
Esterase, Lipase, Bacterium, Thermostability, 332
Thermostability
Conformational stability, Cutinase, Dextran, Immobilization, 60
Esterase, Lipase, Thermophile, Bacterium, 332
Thiobacillus ferrooxidans
Sulfur-oxidizing bacteria, *Acidiphilium*, Direct electric currents, 316
Toxicity
Formaldehyde, Anaerobic degradation, Pathway, Biodegradability, Methanogenic bacteria, Methanol, 255
Trametes versicolor
Dye decoloration, Textile dyes, White rot fungi, Sequential decoloration, 130
Trans-2S,1S-bromoindanol
Bioconversion, *Curvularia protuberata*, Bromoperoxidase, Dehydrogenase, 1S,2R-indene oxide, 86
Transesterification
Cutinase, Lipolytic enzymes, Stability, Reversed micelles, Ester synthesis, Factorial design, 569
Transformation
Chitinase, Constitutive expression, *Trichoderma reesei*, 419
Transition state theory and temperature of compensation
Aspergillus niger, Cellulase, Carboxyl-group modification, Acetylation, Thermodynamics of irreversible denaturation, 599
Trehalulose
Serratia plymuthica, Sucrose conversion, Isomaltulose, α-glucosyltransferase, Isomaltulose synthase, 263
Trichoderma reesei
Transformation, Chitinase, Constitutive expression, 419
Softwood kraft pulp, Genetically modified cellulases, Cellobiohydrolases, Endoglucanases, 371
Neocallimastix patriciarum, Cellulase, Endoglucanase, Rumen, 609
Triphenylmethane dyes
Biotransformation, Decolorization, Synthetic effluent, Textile and dye-stuff effluent, Chemical oxygen demand, *Kurthia* sp., 433
Trypsin
Enzymatic membrane reactor, Caseinomacropeptide, Hydrolysis, Sequential mechanism, 173
Two-phase system
Hydroxynitrile lyase, *Hevea brasiliensis*, Enzyme stability, 514

Uridine 5′-diphosphoglucuronyl transferase
β-D-glucuronide, Enzymic synthesis, Analytical standard, 388

VOC
Surfactant, Pluronic F68, Hexane, Henry's Law, Biofilter, Biofiltration, 104
Volumetric productivity
Yeast extract, Whey permeate, *Lactobacillus helveticus*, Lactic acid, Lactose, 297

Water activity
Lipase, Immobilization, Stability, Ibuprofen, 3
Water mobility
Bacterial exopolysaccharides, Stray field magnetic resonance, Water transport, 339
Water transport
Bacterial exopolysaccharides, Stray field magnetic resonance, Water mobility, 339
Weak acids
Dilute acid hydrolysis, Ethanolic fermentation, Fermentation inhibitors, *Saccharomyces cerevisiae*, 151
Wheat bran
Phenolic compounds, *Coriolus versicolor*, Laccase, 303
Whey permeate
Yeast extract, *Lactobacillus helveticus*, Lactic acid, Lactose, Volumetric productivity, 297
White rot fungi
Biodegration, Decolorization, Effluent treatment, Bioreactor, 48
White rot fungi
Dye decoloration, Textile dyes, *Trametes versicolor*, Sequential decoloration, 130
Wine
Yeast β-glucosidases, Purification, Immobilization, Hydroxyapatite, Aroma Enhancement, Fruit juices, 123

Xylanase
β-mannanase, Arabinanase, Pectinolytic enzymes, *Thermomyces lanuginosus*, 355

Yeast β-glucosidases
Purification, Immobilization, Hydroxyapatite, Aroma Enhancement, Wine, Fruit juices, 123
Yeast extract
Whey permeate, *Lactobacillus helveticus*, Lactic acid, Lactose, Volumetric productivity, 297

Zygosaccharomyes bailii
Respirofermentative metabolism, Gas production, Crabtree effect, 270
